Education

Koneru Lakshmaiah Education Foundation	Hyderabad
Bachelor of Technology (B.Tech) – Computer Science and Engineering	July 2024 - May 2028
CGPA: 9.48	
Sri Chaitanya Junior College MPC Intermediate	Hyderabad
Percentage: 81.4%	June 2022 - March 2024
Sri Chaitanya School SSC School	Hyderabad
CGPA: 9.3	June 2021 - May 2022

Career Objective

Computer Science undergraduate with strong foundations in data structures, systems, and backend development. Experienced in building real-time, AI-driven, and distributed applications. Seeking Summer 2026 internship in software engineering or quantitative technology roles.

Technical Skills

Programming Languages:	Python, Java, C
Backend & Systems:	FastAPI, Node.js, REST APIs
Frontend:	React, JavaScript, HTML, CSS
Databases:	MongoDB, MySQL
Tools & Platforms:	Git, GitHub, Linux, VS Code
Core Concepts:	Data Structures & Algorithms, OOP, Operating Systems, DBMS, System Design Basics

Projects / Open-Source

CipherNexus – Multi-Agent Cybersecurity SOC Simulation Platform

- Developed **real-time SOC simulation system** with multi-agent architecture
- Designed **event-driven pipeline** for detection → response → forensics
- Implemented **WebSocket-based live dashboard with ML-based anomaly detection**

Technologies: Python (FastAPI), MongoDB, React, WebSockets, Machine Learning (Anomaly Detection)

GitHub: <https://github.com/bvishnuvaradhan/CipherNexus>

Live: <https://cipher-nexus-zeta.vercel.app>

Aletheia Gate – LLM Hallucination Detection & Verification System

- Developed **verification pipeline for LLM outputs** using multi-model consensus and web evidence
- Designed **trust scoring system** combining AI agreement, semantic checks, and fact penalties
- Implemented **audit layer** with persistent, explainable outputs

Technologies: Python, FastAPI, MongoDB, LLM APIs, NLP

GitHub: <https://github.com/bvishnuvaradhan/Alethenia-Gate>

Live: <https://aletheia-gate-teal-panda.reflex.run>

MongoArchitect – AI-Based MongoDB Schema Design System

- Engineered AI-driven MongoDB schema design system with versioned schema evolution
- Implemented **analysis modules for query performance, access patterns, and cost estimation**
- Designed **full-stack SaaS architecture with FastAPI, MongoDB, and LLM integration**

Technologies: Python (FastAPI), MongoDB, React, LLM APIs

GitHub: <https://github.com/bvishnuvaradhan/mongoarchitect-ai>

Live: <https://mongoarchitect-ai.vercel.app>

Automated Wild Animal Intrusion Detection System (IoT)

INNOV-A-TECH 2025 – 3rd Prize

- Developed **IoT-based intrusion detection system** for real-time monitoring of **restricted areas**
- Implemented **sensor-based detection logic** and alert mechanisms for real-time response

Technologies: IoT Sensors, Embedded Systems

Internship / Training

ServiceNow Virtual Internship

- Learned **workflow automation, service management, and system administration** concepts
- Gained exposure to **Agentic AI, flows, and automated testing frameworks (ATF)**

Google Cloud Generative AI Virtual Internship (Cohort 12)

- Learned **Generative AI fundamentals, prompt engineering, and cloud-based AI workflows**
- Completed **hands-on labs** aligned with real-world use cases

Google AI-ML Virtual Internship (Cohort 13)

- Gained exposure to **machine learning fundamentals and model workflows**
- Practiced **data preprocessing and model evaluation techniques**

Achievements & Certifications

MongoDB Certified Associate Developer – MongoDB

Advanced Automation Professional – Automation Anywhere

3rd Prize – INNOV-A-TECH 2025 Hackathon

Finalist in multiple college-level hackathons

Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration
